

EMB CALABARZON JOINS MOBILE EMISSION TESTING IN LUCENA QUEZON

June 24, 2019

In celebration of the Environment Month this 2019 with the theme “Beat Air Pollution”, a mobile smoke emission testing was held at the provincial capitol grounds of Quezon province last June 24, 2019 headed by PGENRO Mr. Manuel A. Beloso with the other personnel of PG-ENRO, MENROs and City ENROs of Quezon. Some EMB CALABARZON personnel were likewise present in the said activity to check the results and calibration of the tests.

Air emission from transportation contributes to smog and poor air quality which has negative impacts on the health and the environment. This is recognized by the local government of Quezon and thus see the need to conduct regular smoke emission testing for vehicles for the preservation of the environment, health protection and disease prevention.
