

Environmental Management Bureau – CALABARZON Environmental Education and Information Section personnel Maria Aurora M. Llave, Nini S. Baguio and Anne Canceran visited San Isidro Elementary School, 2013 Regional winner of Sustainable and Eco-Friendly Schools-Elementary level, in Batangas City on March 9, 2020. Ms. Elsie E. Abag, Principal, and Ms. Maribel A. De Leon, Master Teacher I, accompanied EMB CALABARZON in monitoring the school's ecofriendly programs. The monitoring or assessment was done in order to assess if they are still as sustainable as how they were when they won. San Isidro Elementary School is still sustainable and has improved a lot since 2013. Their sustainability reflects not only in the physical appearance of the school but also emulated in their students, parents and the rest of the community.
