

Environmental Management Bureau – CALABARZON Region joined the live airing of Radyo CALABARZON DZJV 1458 Talakayang Kalikasan via zoom on March 12, 2021 which was hosted by Mr. Daniel Castro. Engr. Willfredo Billones, Manila Bay Focal Person, discussed the Rivers found in CALABARZON Region and the classifications of water based on intended beneficial use, primary parameters used in classifying fresh waters, fecal coliform count on selected rivers, and some programs in the Region being implemented to clean and maintain water sources. Engr. Billones also stressed that ground water is not limitless and that it is important to bring back the clean status of water sources to avoid water scarcity. He pointed out that taking care of our rivers and other water sources is a shared responsibility. It is not the DENR's sole responsibility to maintain cleanliness and protect these water sources.
