

Environmental Management Bureau – CALABARZON Region Water Quality Management Section conducted River Classification, Sampling and Monitoring at Cagsiay, Palsabangon, and Bagumbayan Rivers in Mauban and Pagbilao, Quezon last April 16, 2021 led by Mr. Mike Dapdapig, Mr. Froilan Fernandez and Mr. Nelmar Porlaje. Collected Samples were mixed with 1.0 ml Manganese Sulfate for every 100 ml sample collected for sample preservation and stabilization of Dissolved Oxygen (DO). Water classification is performed to allow tributaries within Water Quality Management Area to preserve or improve the quality of the water body in line with the Water Quality Guidelines. Should there be a need to address water quality issues and problems, a WQMA action plan shall be prepared to attain a better water quality of the water body.
