

**Environmental Management Bureau – CALABARZON Region** Air monitoring Section had set up an Air Sampler for particulate matter at the Picnic Grove in Tolentino Ave., Tagaytay on July 2, 2021. This is to determine the Actual ambient condition in the area after the Taal volcano's phreatomagmatic eruption on July 1, 2021. Philippine Institute of Volcanology and Seismology (PHIVOLCS) stated in their bulletin that active upwelling of hot volcanic fluids was still visible at the Taal Main Crater Lake from 5:45 to 6:15 in the afternoon of July 2, 2021.
