

Environmental Management Bureau – CALABARZON Region (EMBR4A) conducts water sampling at the Calumpang River, Batangas City on November 15, 2022 as part of the monthly water quality monitoring of the river. The purpose of which is to ensure that the river's water quality is within the Water Quality Guidelines or Criteria conforming to its Class C classification. Mr. Rolin Gonzales and Mr. Froilan Fernandez of the Water Quality Monitoring Team collected water samples from three different locations namely Wawa Bridge, Calumpang Bridge and Bridge of Promise in Batangas City.
